- TypeScript
- Java
- Python
- HTML
- CSS
- React.js
- Next.js
- Node.js
- Express.js
- Flask
- Prisma
- Firebase
- Redux
- ChakraUI
- TailwindCSS
- DynamoDB
- MongoDB
- MySQL
- GraphQL
- Docker
- Figma

TOOLS AND SERVICES

- Visual Studio Code
- Google/ESRI Maps
- Docker
- AWS, Azure, GCP
- DevOps, CI/CD
- GitHub, GitLab
- Agile development/Jira
- Netlify
- Vercel
- Salesforce

EDUCATION

Associates of Science
Houston Community College
2016-2018

CERTIFICATIONS

- Working on Salesforce Admin
- ReactJS (LinkedIn)
- Node.js (LinkedIn)
- REST APIs (LinkedIn)

WORK SAMPLES

EXPERIENCE

Hilton **Solution Architect developer** May 2022 – present

- Developed robust solutions for data extraction, transformation, and loading.
- Designing and maintaining internal APIs to achieve business requirements and ensuring seamless data flow from diverse sources to target destinations.
- Utilized industry-standard tools and frameworks such as Jira, Confluence, Bamboo, Docker.

North Shore Automation **React Developer** May 2022 – present

- Meeting with the development team to discuss user interface ideas and applications. Documenting application changes and agile development in ReactJS using Jira, GitLab, confluence, and docker.

Independent contractor Oct 2020– Feb 2022

- **InvestViv (Front end):** Integrated with backend team to create dynamic web applications using UX/UI mockups. Tech. used: TypeScript · Next.js · Tailwind CSS
- **TokenSpace (Lead developer):** Lead a team of developers to design and develop mobile/ web applications. Assigned coding tasks to various members. Directed team meetings to check on progress and plan code direction.

Polestar Global **Software Intern** Jun – Sep 2020

- Designed a proof of concept to provide efficient search and filter features for ship tracking data using ReactJS, and Python/Flask API.
- Coordinated with team lead to efficiently achieve project goals.
- Utilized Google Maps API to visualize ship movement.

Reliability Measures **Front End Developer** Mar – Jun 2020

- Collaborated to build a tool which could analyze and evaluate the efficiency of exams and teaching strategies which improved students' learning outcomes.
- Lead the front-end development efforts to create a web app using test-driven agile development methodology (React.js, Redux), which allows users to interface with the analysis tool.
- Coordinated with the back-end team and project lead to improve the API (Python/Flask/MySQL), efficiently allocate resources, and meet project goals.

PROJECTS

An Interactive LMS

An application for private schools and learning centers to manage, track, and enhance their classes and lesson management. It provides online registration for parents and students as well as admin to manage users, classes, and lesson plans
